Notes: $\qquad$

## OPERATION

## DESCRIPTION

Hydraulic separators are used to isolate primary circuit flow from secondary circuit flow. Great for heating and snow melting applications with multiple temperature zones.

The Calbalance 2 zones allows to connect two zones directly.

## TECHNICAL SPECIFICATIONS

- Equipped with Calvent automatic air vent
- Painted steel frame

Thermometer port

- Maximum operating pressure: 150 PSI
- Maximum operating temperature with insulation: $100^{\circ} \mathrm{C}\left(212^{\circ} \mathrm{F}\right)$
- Maximum operating temperature without insulation: $132^{\circ} \mathrm{C}\left(270^{\circ} \mathrm{F}\right)$
- Connection: NPT, 1" to 2"
- Adapted fluids: water and up to 50\% glycol solution
- Drain valve

Provided with wall bracket

## TYPICAL SPECIFICATIONS

Furnish and install as shown on plans a Calbalance hydraulic separator from Calefactio. The hydraulic separator must serve 2 zones and be equipped with an automatic air vent, one plug, a drain valve, and a wall bracket. Each hydraulic separator must resist a $100^{\circ} \mathrm{C} / 212^{\circ} \mathrm{F}$ maximum operating temperature and a 150 $\mathrm{PSI} / 10$ bar operating pressure. It must be made of painted steel frame, and adapted for water and glycol solutions up to $50 \%$. The Calbalance hydraulic separator must be a model CB $\qquad$ $2 Z$ or approved equivalent.
